Smart Budgeting and Financial Goal Management System

Stakeholder Register & Requirements Traceability Matrix

Official project name	Smart Budgeting and Financial Goal Management System
Prepared for	Team J
Version / date	Version 1.0 | 8 October 2026

Working draft. Confirm project-specific decisions with the team and supervisor before treating this document as approved.

1. Stakeholder register

Stakeholder	Interest / responsibility	Engagement
Project team	Build and test a coherent MVP; keep documents consistent.	Weekly planning and progress review.
Supervisor / lecturer	Check academic scope, design quality and evidence of implementation.	Review baseline and milestones.
Potential end user	Need clear entry forms, useful summaries and trustworthy privacy.	Gather feedback through brief usability checks.
System operator / maintainer	Keep application available, patched and backed up.	Review deployment and maintenance instructions.

2. Requirements traceability matrix

Requirement ID	Requirement summary	Use case	Design component	Verification
FR-01	Register account	UC-01	User/authentication	TC-01, TC-02
FR-02	Sign in/out	UC-02	Authentication/ session	TC-03
FR-04	Record income	UC-03	Transaction API/model	TC-04
FR-05	Record expenses	UC-04	Transaction API/model	TC-05, TC-06
FR-06	Manage categories	UC-05	Category API/model	Category validation tests
FR-07/08	Budgets and monitoring	UC-06	Budget model/calculation service	TC-07, TC-08
FR-09/10	Goals and progress	UC-07, UC-08	Goal/contribution models	TC-09
FR-11	Dashboard	UC-09	Dashboard summary API/UI	TC-13; reconciliation
FR-12	Reports	UC-10	Report endpoints/charts	TC-10, TC-14
FR-13	Smart insights	UC-11	Rule-based insight service	Insight rule tests
FR-14	Data isolation	All private use cases	Server-side permissions	TC-11
FR-15	Input validation	UC-03 to UC-10	Serializers/forms/ domain rules	TC-02, TC-05, TC-14
FR-16	Persistence	UC-03 to UC-10	Database layer	TC-12

3. Review and change log

Version	Date	Change	Status
1.0	8 Oct 2026	Initial supporting	Draft for team review

		documentation set created; official project name standardized.	

4. Review checklist

- Every requirement has a unique ID and can be tested.
- Every core use case maps to a requirement and relevant design area.
- No out-of-scope feature is implemented without approval.
- Any requirement changes are reflected in SRS, use cases, design and tests.
